

IF YOU CAN DREAM IT  
**YOU CAN DO IT.**

Diary of a Latin Lover.

Ginés Muñoz.

# FIRST WEEK

---

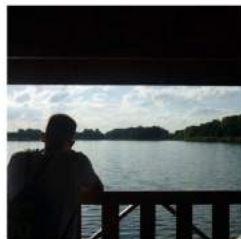

This week is one of the most important of my life. I left behind my job, my flat, my nice weather. I took an important decision, a new way and already I made my first step. Now it's time to make real my dreams! I will grow different, I will a lot of things. This weekend we learn about our project here, having little accommodation and welcome about EVS knowledge. Has been very funny and interesting for me. Here the people is very strange, it should to be the cultural shock. We went to Zielona Gora and to Slawskie Jezioro with ours mentors to start to know something about the country. They are crazily nice. I think that Ada is very watchful and careful with me. She is not Karolina, she couldn't be my mentor because his trip to Malawi, but its a good election. Is only the first week, the best is yet to come. Nie mówię po polsku.

HOLA GINES  
WELCOME  
IN POLAND!!!

## SECOND WEEK

---

Meeting, meeting, meeting and me waiting for action. This people spend a lot of time in the meetings, meetings witch is not very productive from me perspective right now. We are here talking, talking and talking, missing the action. Good that finally we ended the week meeting in the office and talking about something really important: the respect. Something that is the most important for me here, the respect can make the different every time about our behavior between people, and it's usually difficult to find everywhere. Sometimes it's just a matter of empathy and common sense. Meet other points of view, different customs, religions, sexualities, abilities and views makes me grow as a person. And It's the reason because I'm here. Fuck is very difficult for me to follow the conversations in English and I'm tired.

Note: polish people give the hand to girls, 1 or 3 kisses in case.

I need time, like 9 months. Cheers.

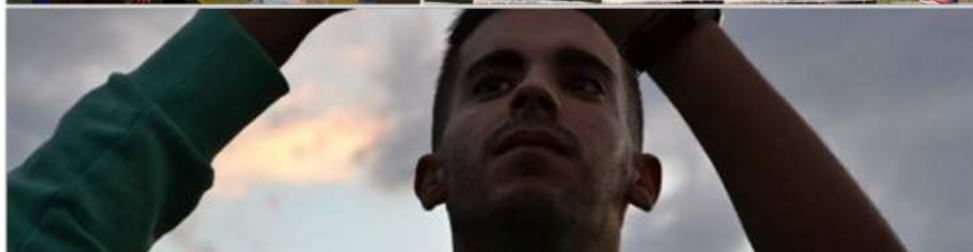

## THIRD WEEK

---

Time flies. The time is gold. I have to improve a lot my working methodology here, I think if I can stabilize my job could work twice as fast which I am doing now. I feel here sometimes that my ambition far beyond my limitations. Regarding the workshops, I need a lot of help from my teammates for to do the poster on Monday. I had the texts but I can not do nothing for finish on time without the whole information, it's a waste time and health looking at my screen during hours when the objectives are not clear. I will motivate them today to have it sooner. For my job as a professional advertising and graphic design, when I start working with a new piece I need to have clear ideas from the beginning, and avoid mixing all opinions, because I lose sight of my goal. I need help and I'm getting. I am delighted when people smile at my design, it is rewarding and makes me happy. Thanks for working with me Magda and try to make it easier. Win Win. My mentor is wrong. I do not want that Ada is sad. But sometimes nature does not wait to act. Due to the state of health of my grandmother, I feel a lot of empathy for her and sometimes I mourn. Hopefully I can help with my words until I will see her again.

Welcome party!

## FOURTH WEEK

---

Finishing my first month? Wow, difficult to believe it, all is happening very fast. And it reminds me that I must do spend very good each second here. My birthday has been great; all my flat mates did a big effort to surprise me (I knew their plans a lot of time ago ☺))) and was great to fly in the air tunnel. Crazy! For to be honest, I was afraid to break my head with the glass.

The forest and lakes here are amazing. And yes. I'm 25. Energy!

# FIFTH WEEK

---

Play hard, work hard. Common baby don't stop me. This was an intense week, full of different activities and with a lot of hours in the office. We are starting to know better and our work is improving a bit now, I 'm receiving a lot of help of Luiza and Ainara to print (For example) and Alex found a free version of Photoshop Creative Suite and maybe we can use this for my workshops about graphic design in application with the creative advertising. Would be nice. Sometimes I'm feeling strange here sometimes when some people try to laugh about cultural different or something similar, maybe is for stereotypes, the color of my skin or my appearance of foreigner. It's difficult to understand for me, maybe in their countries they have a primitive mentality. Remember me when I was 16. Cheerfulness, always cheerfulness!

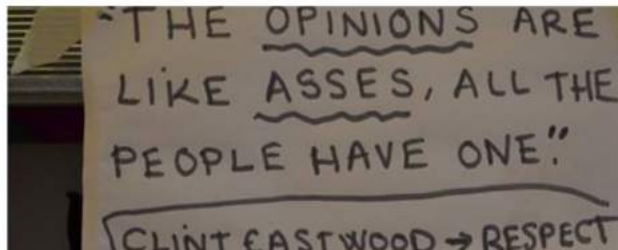

## SIXTH WEEK

---

New volunteer, new works, new experiences. I always love the beginnings, totally in love. I feel a unique opportunity here and that I must to do an extra effort for this people, and I'm going to do it.

Will be interesting coordinate and work with all this new group. I feel specially a lot of empathy with Yavor. The beginning of her experience like EVS was very difficult and the Saturday he was kind of sad and he decided not come to Mala with all the new volunteer. I need to help to her, please give me time for to speak and help her taking a coffee. When I see a good persona suffering I need to change this situation, this gives me a lot to think about.

We are in this world for be happy.

## SEVENTH WEEK

---

Nice week, I want more. On the one hand was not a very nice experience to be with pain in my body for eat the cow's filet, what a weird meat. The people was stressed this week, what happen? It can create stupid problems sometimes; the people should to enjoy this wonderful experience 100%,

OMG, very are European young volunteers. Some people here doesn't have maybe important experience working and they can not manage very well their tasks. I'm coordinating mine for get an excellent result, and I coordinated by the way the trip of my super mentor to Murcia. I feel good because now all is more than ready for Ada and Mateusz, they help me a lot of, and now my father will give to them "Jamón, queso y lomo" part for me and a gift for them :DDDD. On the other hand, I enjoyed my work with Veronika, and specially alone in High School Nr 1 and of course the Friday with all the new volunteers dancing the EVS version of Macarena, we are amazing. Do you know that we have a new version of Macarena in the foundation? Maybe one day we will tell you the new steps.

I love this people.

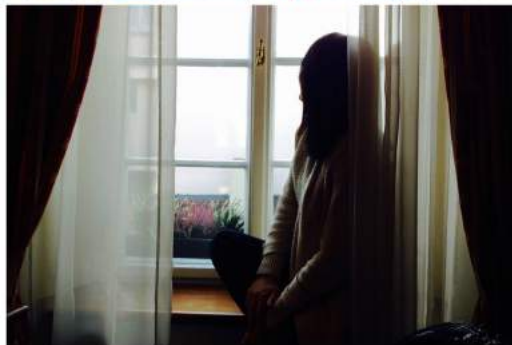

## EIGHTH WEEK

---

Nice and totally complete week, only I need a little bit of time for work in my Spanish presentations and in my workshop. Normally I have more work here than the rest of the volunteers, the time working in graphic design is very difficult and hard to control, specially in the beginning and when we are working in technical creativity, it's not a world of unicorns like people think. I need to prepare a complete program for my lessons, and for now I never can find the moment for this. Maybe the next week. I'm a little bit worried about my graphic design workshop, I 'm very exigent with myself and the quality of my work and I don't want to make a regular workshop, I want to teach in the best workshop of graphic design that have existed in the world for free.

Yes. The best! :)

## NINTH WEEK

---

How to explain so much in so little space? In this lines I express myself and I would need a book for everything, maybe can be good idea for final report. Everything happens quickly when you like your life and enjoy your work, sometimes we should stop for to laugh and breathe. Sometimes we should stop to enjoy the autumn and this beautiful city. It's exciting, very different everything to my lovely Murcia, totally in the south of Spain, but I love how the trees and flowers grows here, I guess that I'm falling in love right now. And the next week I will start my workshop, week will be intense. I'm sure. But I should not trust me too much any time, I can not make mistakes in any sense.

Spoko loko.

## TENTH WEEK

---

Exciting and hard week again. The marketing and the general plan here is a little mess, we need to coordinate better our ideas about creativity, promotions and posters. The people sometimes think that I can create all by myself, but without text in polish, without objectives and without instructions is impossible. This stop my work and spend my time too much. The question is that sometimes the people don't know what they want, it is totally counterproductive. For promote we need to have clear all the time what is the objective, the target, the channels, the sizes, the copy, the creativity, and the strategy almost. And sometimes we don't have nothing of this elements. I love my work, and I love to be designer here, I 'm feeling an artist and creative. For this reason, I'm going to improve the way to work of this organization about graphics, explaining to the people and insisting. All we are going to win.

## WEEK ELEVEN

---

Arrival training course. my second honeymoon. I can't describe easily this week in my Arrival Training Course. I started and finished it totally full of energy and happiness. On the hand, we found a very good planning, completed of interesting activities to learn more about how to work like an EVS in Poland. We had very nice monitors, the animators are great, the connection between they and all the volunteers was great. I was learning every second, with the best motivation and participating all the time in all the activities and games. On another hand, I found news and very very good friends in this ATC. My relation with them was the best, enjoying and laughing every day. Discovering new cultures, new points of view about the life and dancing like kids in the parties. I have now a lot of cities in my list to visit :). Was great to have deep conversation about our life, about our feelings here in Poland and about our expectative.

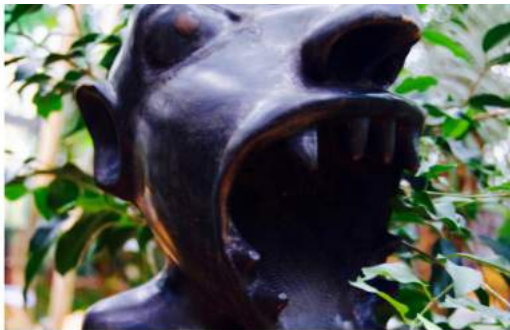

I feel lucky, I feel rich. All is perfect.

## WEEK TWELVE

---

This week maybe was one of the strangest of these 3 months. Ainara is getting kind of sick, and the situation with her changed my point of view about relevance when I discovered it. From the beginning, I couldn't believe what was happened because I didn't know about this part of the live of Ainara. The Saturday night in Warsaw she was more or less normal, and she didn't tell me nothing special. But she started to be worst and worst every day, sometimes creating crazy situations in the office or in Mala Koscianska, complicated for the volunteers in the work and complicated for my flat mates in the daily life. Finally, we took very good decisions and worked fast in solutions, was very important to be fast in this topic. This kind of situations can destroy to one person very soon and It's is very sad. Finally, I only can say that is possible to cure, and I only want to have this positive thinking and I will pray for it. I'm going to continue speaking with Ainara and Antonio every week, because I can give important information to the Spanish doctor. Note: the workshop this week really was the best of the history, it makes me very happy :). Yes. We can.

## WEEK THIRTEEN

---

This week helped to think more in my work, in my clarification and in my calendar. On the one hand, I knew better to myself, and I'm going to coordinate better my activities and my time to do all better and with more time, enjoying all the possible. On the other hand, the time is flying, and it remember me that I should to be spend more time with my short terms, they will go to their countries soon, and It' is the best moment to do the best and to be happy to have the best memories. People from Poland, Portugal, Brazil, Estonia, Hungary, Italy, Bulgaria, France, Nepal, Kenya. Everybody working together, destroying stupid stereotypes, going to party, loving... Volunteers love.+

## WEEK FOURTEEN

---

This week means the final of one important season, our dears short terms are finishing here with a good flavor for me. I really found good friends here, I putted all my power with them at 110%, because I feel that It is finishing, like all the good this of live. Will be difficult to say bye bye or see again, but I prefer say thanks you to each for all the I learned, specially with Yavor, Gulsemin, Tuba and our Human Rights activities, or with Sara laughing and smiling every time in our presentations, dancing and signing. I took a lot of positive energy. We are going to have more short terms soon?

Please, I hope.

Always I want more, we don't have limits.

## WEEK FIFTEEN

---

This week is a difficult week. I´ m not speaking about the work, I'm not speaking about the activities or calendar. This week we must to say “see you” to one special group of people, all them great and amazing humans, different each one, similar all. Was a pity and back luck that happened to my laptop (Reseated), no for the computer, because one computer is one computer, only is metal, plastic and sophisticated pieces. In the end, only is a material and it is not important for me. To lose my pictures, movies or videos of this 3 months inclusive is not very bad, the real photos and memories that I need, I have recorder in my memory and in my heart yet. But in each order, I lost a lot of folders and files very important for my work, now I need to do an extra work and little effort. Specially I lost my posters for December that I finished yesterday with a very nice result :(, I have lost a lot of files in PSD. format (Photoshop original file) and templates that I use every time, and I need to create a lot of them in the beginning. I lost my workshop PowerPoint presentation, and some exercised that I was finishing for the Spanish language of January, and in general very important materials for continue in 2016. These things sometimes happen, It's the life, but I only can laugh of the situation a work very hard. Note to fight against the destine: Do security copy every month. Never every 3 months.

## WEEK SIXTEEN

---

All the good things finish, like this great year 2015 is finishing. This week was very important to think together in the next year. In the work, in workshops and activities, in my holidays, in my personal life. Thanks you again for the facilities that you gave me for my work, I'm finding very good illusion and feelings, participating in the local traditions and folks I'm starting to feel a little part of this country. But fuck, it's very cold. It's true that the snow exists? I need to start to think and buy special clothes warmer. Good that I'm Latin lover and my blood is always hot.

# WEEK SEVENTEEN

---

One special, great and perfect Erasmus+ year is finishing right now. Full of work, new experiences, feelings and positive vibes always. Taking only good things for me, and by the way changing stereotypes: polish people is late, very late sometimes in my meetings (45 minutes was the record). I´m enjoying like a baby, learning every time, every second. I have the impression that I´m doing something nice about arts here, my paper like graphic designer, Spanish teacher, human rights promoter, going to High Schools and participating in local events every time. Work in that I love is my dream, I'm full of vocation here, and I want more. Sometimes result incredible how the time fly, the life is only two days, and we need to remember every day to smile and continue trying give 110%. I have the sensation of to have find here all that I was searching.

Free and wonderful world.

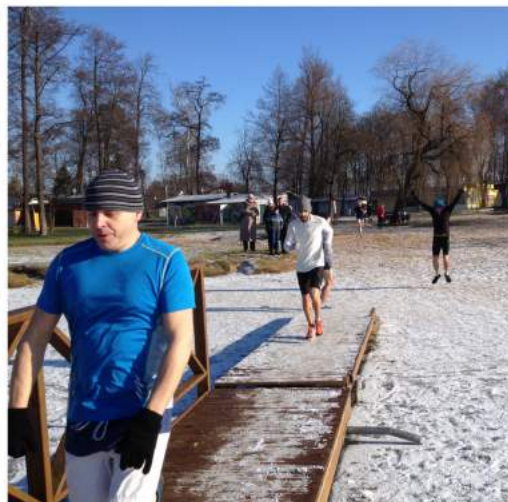

## WEEK EIGHTEEN

---

Bye bye 2015 and thanks you for everything, bye bye holidays. On one hand, it's time to break totally with the Christmas lazy time, start to cook ideas, warm motors and move the ass again. I have charged my batteries to do it, with illusions and fresh ideas for all my activities. Although was a relaxing week in our schedule, finally! I think that I used very good this time for have new contents for my language coffee and to take advance in my future work plans. And of course, to enjoy better my free time, watching series to improve my English and having skype with our short terms. On the other hand, this new year bring new volunteers and a lot of new interesting plans for me. They are very nice; I want to help to do a perfect accommodation for them. I feel that They are going to be very useful in this next months for us, and they should to enjoy and be very very happy in this nice project. Like always, the time is flying and I need to remember my principal objective and continue working for help to the people here in Leszno.

Life only live once. Life is two days, and going by the second. The time for to do that what we want and we love is now. Free world.

## WEEK NINETEEN

---

One strange week for the previous work for Eurocamp and winter camps. People is getting crazy and stress here sometimes for nothing, taking too much work and worries for home, like my dear girl's flat mates. They forget that we are only volunteers, and that we are working with kids, doesn't have any sense to be too much worried about this special weeks, we are doing in general very good our work. OMG, we are working with kids :). I like it! For my part, I'm putting special effort in enjoy the time and all the activities, of course without forget to be a professional and without forget about the education that my parents gave me. Sometimes the simplest thing is the best thing for this kind of activities, and I'm satisfied because all mine is working very fluency.

Take it easy!

## WEEK TWENTY

---

Winter Camps ½. Result great to work in it with the polish volunteers, they are totally nice and they are exactly the kind of people that you need in cat. For to be honest I had doubts about how can be the work in this special week, but the reality is amazing. I can't understand nothing when somebody is totally worried about the work here. I know very good what means real hard work, and

I'm not speaking about graphic design or management. Usually when the people speak about Spanish stereotypes is funny. Is complicate compare play with kids with move 15.000 kg of meat per day in 8 or 9 intensive hours, destroying your body sometimes completely, needing to go to physiotherapy and swimming pool, or work 12 hours with the sun in the neck in the summer like a lot of my friends and muslim people in my lovely Región de Murcia. They are not special for nobody, but for me are superman's. But maybe depends too about the motivation and feeling that we can have here, can be a relative value of each person.

# WEEK TWENTY ONE

---

This week has been very special. We finished the chaotic “Winter camps” with a very nice sensation from my point of view again. This is not like the legend told me before to start. On the contrary, this experience result like one of the best of my long term. Sometimes was a little bit stressful in the beginning for the bad preparation about the food, timetable or the rooms. But it is only one small of all the elements that take part, that Milena should to improve his part a lot for the future similar project. From my point of view, I must say that it was nice work, about all and specially for the polish volunteers. Although we prepare the timetable with workshops and presentations and blablabla, they have the most important work, they are the most important and the best of all the team. It surprised me a lot of during the two weeks and in every place, because some of the are very young but totally responsibilities and diligence. More that the adults. Finally, I only want to say thanks again for all, because this week's make me think again about my objectives here, remembering why I'm here now.

Thanks god.

## WEEK TWENTY TWO

---

First holidays going out. 0 work. Poznan and Praga are waiting! Seni seniorum.

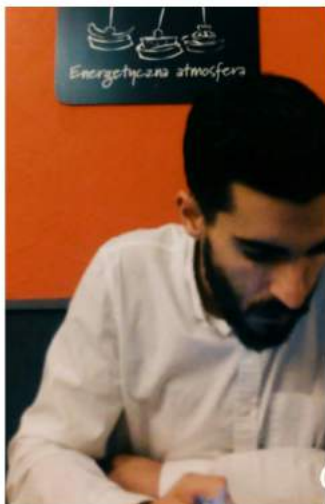

## WEEK TWENTY THREE

---

Coming back of holidays. Aaaaargh! This week maybe was coming back I was sick two days, but even with this situation I can say that was a very good working with Roksana in HS Nr 1 about

Routines in Spanish language, working with Ozge and Gizem and more people in a successful CATRAOKE event, going to the hospital :S and watching a movie together on Friday. I learned a lot of about planning events and about how to teach Spanish in big groups. I never was teacher like that in Spain, and I remembered too again that sometimes the body say “Stop”, my body couldn't support this virus only with Neurofren. Go to the bed and sleep.

## WEEK TWENTY FOUR

---

This week during my working hours I putted focus in activities with kids, and I feel very happy for work with Veronika in the center of people with disabilities, sharing our culture and passion with them. This was a special week for all of us, because very soon Giulia and the short terms are finishing their projects here like Erasmus+, and we prepared a lot of surprises for them, inclusive for the 24,5 birthday of Luiza too. Doing this kind of things together I can feel in a team again, having fun together like from the beginning. After to complicates moments for our baby flat mate, I'm learning a lot of important thing of myself too, every day is a little but important step for me.

## WEEK TWENTY FIVE

---

I can feel a shy beginning of the spring, and with that, the beginning of a new part of the project. We are reorganizing ourselves, is time to take fresh rolls about our work in CAT. The middle term finished the “Ecuador” of our project and kicked our ass to think in future. The future is important, but no more than today and tomorrow. I will start the great happy ending ^^, because the best is coming quickly, spending smarty the seconds here that never will come back in our life, everybody is an important piece now to make something unique and memorable. We are doing it.

## WEEK TWENTY SIX

---

I finished a new week full of work totally excited for the best new time that is starting. I feel very useful always here, and I can feel good feedback about my tasks, and very happy for to finally have a mentor perfect for me. Ada was very nice with me, but she is not ready for manage something like that, she has too much stress and anxiety in general, and this shit is not mature and for me with 25 years. Tomek is the contrary, mature, quiet and correct always. He is from Leszno and we are meeting every week, sometimes two or three times, my relation with him is really beauty and healthy from the beginning. I'm very lucky again for to find the perfect piece of my puzzle. And by the way, I'm not forgetting to look myself everyday to improve some basic skills that make the difference. The effort and the details. GO!

## WEEK TWENTY SEVEN

---

This week was frenetic for the activities that we have, specially on Friday with the language contest and the cooking time in the last moment for the weekend in Oczipna. We spent a nice time together with each volunteer this week and weekend. Meeting with my great mentor, making a good accommodation for the new volunteer Jesús and motivating our brains for new vibe is my resume. The morning recording video on Saturday was great and we are going have a good video promotion very soon, specially thanks to the Turkish team, they really were in the project, helping me a lot.

Give me time baby one more time! :)

## WEEK TWENTY EIGHT

---

Full and very complete week for me, taking part almost in each activity was very short for me. This was the week for the accommodation for the new long terms, and right now, Olé! Jesús and me we are preparing our first trip together. Starting to work with new EVS was nice, we have great group very different and ready for the action. I need to plan better my next holidays for to have everything in order, but always I have something for to do in my schedule here, and I cannot take it easily because the compromises with teachers, people and of course with the Foundation. I finished destroyed but very happy with a lot of purpose.

## WEEK TWENTY NINE

---

Feeling like in home celebrating Easter and spending a lot of time with my amazing mentor and my new polish family. I'm feeling part of the traditions and folks every time, receiving invitations and trying amazing food also, before to start my first trip with my work and roommate Jesús! Let's go Bydgoszcz!

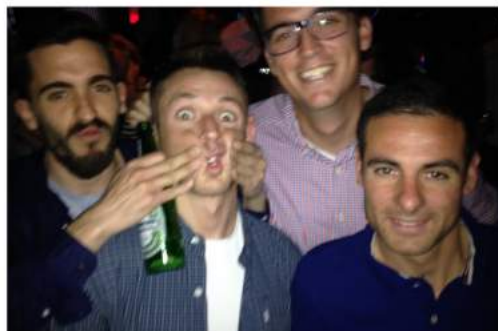

## WEEK THIRTY

---

Coming back to home for a week ^^, special time to have some meeting, relaxing holidays and about all for to thinking in future. Perfect moment for this trip, I have meetings and job interviews ready for spring, special time to enjoy my lovely and amazing Murcia (24C°), and for to bring winter clothes and some presents made in Poland: 7 bottles of Vodka included.

## WEEK THIRTY ONE

---

Coming back to Leszno I have the nice feeling of to feel again in home, my second home is here now.

My great mentor picked me in the airport during the night and although I came late, my trip was totally perfect again, bringing some kilos of Jamón and Lomo to endure a bit :P. These days were enough for put in order my task and ideas, planning my next week and my last two months here.

Participating with everybody I can feel always productive for to have the opportunity of give the best of my skills, specially promoting CAT activities, learning, taking more experience and growing every day like the first. It's CAT Leszno, work and love for everybody!

## WEEK THIRTY TWO

---

Hard week full of activities and task, my time was flying and I couldn't to think too much for my activities, sometimes was so crazy to plan and have ready everything good, but finally I did it perfect, working at 130% in the best level. But a new plan for my holidays with Gulsemin! I think that travel here and now for the neighbor countries is going be my best decision and heritage, I will not have possibilities later to come from Spain, and the world is very big! Austria, Slovakia and Hungary are waiting for me.

## WEEK THIRTY THREE

---

Short and special week, right two we are in a party celebrating Europe Days in Kindergarten and in Rynek, something that was very nice to do with nice weather and good feelings, I feel that my last months here are going to be the best. Work with Valeria and Jesús is always a good formula for the success for me, because we are not never embarrassed and we love to dance and have fun together. Something that we bring with us to the work every time, taking like a part of our activities. ¡Dale papi fuego!

## WEEK THIRTY FOUR

---

Cool and super productive week. After a lot of trips, I could have opportunity to work in my specials tasks, and supposedly I will have a lot of extra time in June only for it. I hope, because I want to do some really good end with great designs, for the youth exchange, training course with the banner and Roll-Up specially. Now I can see every day closer the end of my project in the horizon, but the beginning of a really good in Cluj, Romania. Everything is going alright, and now with the good weather I'm feeling that I will have a last sweet month here.

# WEEK THIRTY FIVE

---

Workshop leaders playing hard in a new and different experience is coming for me during this week in the Youth Exchange. Leading this workshop with Veronika was a big Experience, I managed my responsibilities successfully in a topic what I don't use to, but she needed me and the rest of volunteers didn't want to help her. On the one hand I feel happy for receive a very positive feedback of all of them, putting focus in a very relevant topic for our society. On the other hand, I feel strange, because I didn't expect and choose to have such responsibility for myself during the youth exchange, it was a bad German organization and a surprise, but I did it only for my workmate and for CAT. But I managed with very positive results. Finally, I hope that our work and my personal conversations made a change in the mind of the people, because sometimes is very nice to speak deeply, but if we don't do nothing for change our local community, our environment, or something, I think that it is a fucking lazy hypocrisy of the people (we) who lives "ok" in the comfortable countries of Europe. The Europe of the declaration of human rights is a total fake, when the people really need this rights we are not giving them nothing. We should to do something more, we are sleeping in nice beds and sitting our asses while we look the show in the news, like a movie.

Free world.

## WEEK THIRTY SIX

---

Shorty and pleasant week, the Spanish-Polish team leaded the Mok very successfully. Going to the place is not enough when you have the right motivation, we are always ready and available for to improvise good thing when the plans are not clear or inclusive a disaster, we the Spanish team are the best resource today with our pen drive for emergencies. We are finishing May and I started to feel this month less motivation of other volunteers, but the ending of the project should not to change nothing, is the best moment for enjoy, relax and work good. Chill!

## WEEK THIRTY SEVEN

---

Great and important week for me, I was wishing a long time ago to have my Spanish cultural evening. Although was on Monday and after a long weekend and some of my friends couldn't to come for the presentation, it was perfect. The morning cooking with Jesús, Veronika and Valeria specially was very good, they are hard workers and they followed all the steps very good, specially my bro Jesús helping with the shopping on Sunday and participating in the presentation about sports and Spanish parties. Tomek was the perfect support, friend and translator for me, like always. Also, I enjoyed a special week having presentation in special school about Hungary and Spain, what for me means real volunteering. Give our best time and energy there was gorgeous for me, it's becoming in a very important part of my experience here.

## WEEK THIRTY EIGHT

---

Shorter weeks are coming, but I wake up every day with the intention of enjoying like the last second, specially with my friends here. Working with a lot of time for graphic stuff is going to be very easy to have on time my objectives I think. Thanks Magda. I will have some extra time for my final report, portfolio and youth past too :). This week I'm starting to take my last holidays days, enjoying good weather in the lake and going to Lodz for International Boat of Culture during the weekend, everything is perfect for a happy ending. I will miss you sometimes Leszno people, I only can say thank you for everything what I'm receiving, improving and taking for me during this project, growing like professional, but specially like person. I love this crazy foundation!

## WEEK THIRTY NINE

---

International Boat of Culture was an amazing, incredible and unexpected great third honeymoon, a crazy weekend full of good people, friends, activities and positive vibes. Conferences, speeches, human library, workshops, concerts, exhibitions, good party and a lot of art and culture. I felt like in home with the best people of the world, sharing unique moments like a family for our lives, dancing, chilling, singing and sleeping together. This experiences are giving me always an important opportunity in the life for my personal learning and happiness. Now is the time of my life, it's like that. Difficult to have it better. Free love!

## WEEK FORTY

---

It's the end of my steps here. An important project of my life is leaving. I will miss this shit, I'll leave behind unforgettable moments, but in the same time in happy for to come to home. The life continues my friends, and another people and nice steps are already waiting for me. In Mala papi fuego and me we are partying hard this weekend, going out everywhere here in our last moment together and watching Euro champions football. We met Spanish and polish friends for to have our last dinner together also, going to speedway... Wowh! Crazy raining today almost killed me, I'm soaked to the bones :S

# THE END

---

Everything good ends. It's time to say see you, with the incredible feeling of having found here exactly what I was looking. Ten countries, ten months. An incredible experience difficult to tell on some lines, full of amazing moments which I will keep in my heart forever. CAT rules, you are awesome guys doing very important here. This time was also for rediscover myself again in a very important moment of my life, step by step, improving and changing for better everyday like a kid, opportunity to develop myself and my skills. Arrival training course, middle term, events, countless festivals, parties, places, workshops, karaoke, graphic design, social responsibility, human rights... Honey Moons which made me very happy a lot of times. You can't expect something like this, I feel really lucky to share this project and moments with amazing people from the whole world in each corner with something interesting that I took for myself during breakfast, lunches, dinners, cool parties and long conversations. True friends. True love. A step finish, and a new one already started for me.

La suerte nunca se olvida.
