## **INTRODUCTION**

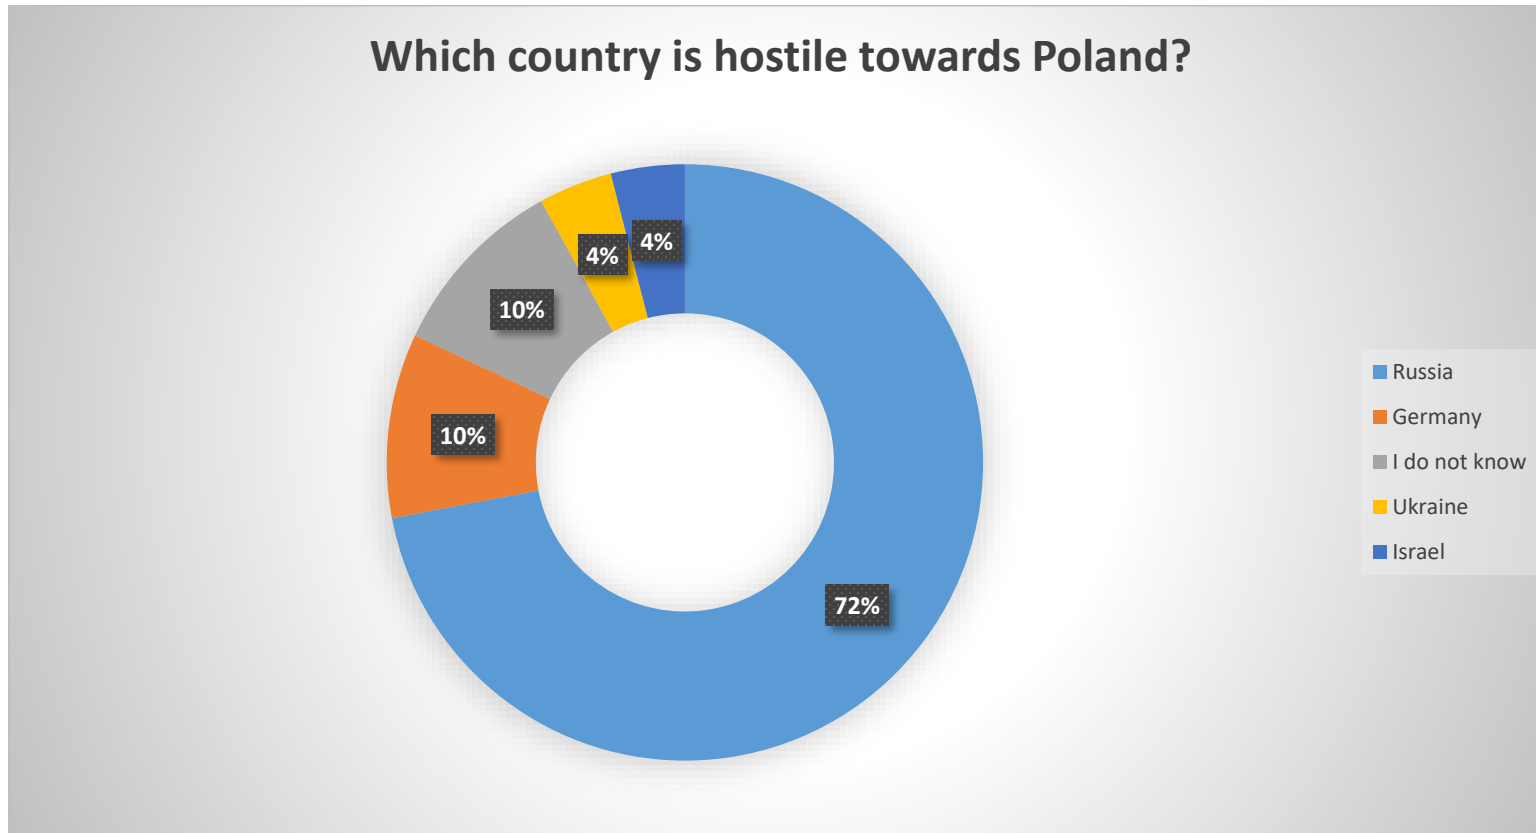

Young People are the future decision-makers of each country that's why I've decided to do a survey among them in Poland while I was volunteering for FUNDACJA CAT in Leszno in the framework of the European Solidarity Corps. The aim of the research was to find out the tendencies and approaches towards various issues among the youth. It was conducted in February 2020 in some schools of Leszno. The age range of interviewed people is between 15-45 y/o. They have been given 13 questions to answer about different social matters. In total it was interviewed 47 people. I was eager to interview more and more youngsters but due to coronavirus outbreak all the schools were shut down and it became impossible to do. Except students couple of teachers were asked to participate in our survey as well, but predominantly the study is done among the youth aged 15-20.

## **CONCLUSION**

It was my very first attempt to conduct such kind of survey. Definitely it does not show the full picture of the social sentiments Polish youngsters as the study is implemented just in one Polish town, namely Leszno and it is highly possible that outside it, in other parts of Poland, people have totally different thoughts regarding those questions. Still this survey helps us to understand much better what are the issue which concerns the youth the most. Initially I was supposed to make a small comments in each topic, but later I have decided to do not do like this as results say everything itself. So I suppose it is better to give the floor to the audience to draw their own conclusions based on the facts and numbers which I provided them.
