General information about the project

Zavod Škatlica is inviting you to take part in "Let's draw" international project on graphic facilitation as a means of improving learning effects.

According to research, we know that using visual tools and graphic facilitation improves the chances of remembering content for longer by up to 40%. With that in mind, the project partners come together to build a community that will support each other in a sustainable way in exploring graphic facilitation to improve learning outcomes.

With this project, we want to learn new methods to increase the learning impact of the young people involved in our organisations' activities, improve the quality of our youth work and training, encourage creativity and boost confidence in drawing, to realise that everyone can draw and many other things.

Project timeline

Online preparation during summer holidays

We prepared different tasks for you to complete till the training. The purpose of this is to start your drawing skills training, where perseverance and repetition mean a lot.

“Training course” (10 days): 12. 9. - 21. 9. 2022 (Spain/Cabra)

During the TC, we will address the questions: How to start drawing? How to capture the essence of the message? How to simplify and make the message of your drawing understandable? How to use new knowledge and skills to better support the learning process of the young people involved? You can see the draft programme down below.

Online practice: 1 task every month

Creative online activities follow, with the aim of keeping the skill of drawing alive and getting as much practice as possible.

Dissemination workshop in the local environment

After the TC, you will be asked to organize a 2h graphic facilitation workshop for your staff and people working for other local/regional organizations linked to yours. In doing so, you will promote and share the content and methods you learned while gaining practical experience of how to put the content into practice.

“Follow up” training (7 days): 30. 4. - 6. 5. 2023 (Slovenia)

The programme will be focused on upgrading your newly gained skills.

Time for you to disseminate the project in your local environments (till 30.6.2023)
